

THE STORY SO FAR — A MINI MANIFESTO

THINK INDIA PARTY

TIP

The change at your fingertip.

EXPANDED EDITION · 2026

GOTIP.IN

01

India does not have a leadership problem. It has a **maintenance** problem.

We are not short of roads, laws, institutions, or good intentions. We built all of them. What we never built was the discipline to maintain what we built — to repair instead of inaugurate, to enforce instead of announce, to finish instead of forget.

480+

ROAD DEATHS IN INDIA
EVERY SINGLE DAY

53%

URBAN VOTER TURNOUT IN
CITIES LIKE BENGALURU,
VS. 73% STATEWIDE

96th

INDIA'S GLOBAL
CORRUPTION RANK —
VIRTUALLY UNCHANGED
SINCE 2012

Look closely and the pattern is everywhere. The pothole nobody owns. The policy nobody enforces. The promise nobody is held to. Not bad people in power — a system with no real feedback loop, designed for announcement, not accountability.

We think differently.

02

Three words. One discipline.

Rethink

Before anything new is proposed, we ask why the old thing failed. Not to assign blame — to understand. Most institutions move on from failure. We start there.

Rebuild

Once we understand why something broke, we fix it — properly, visibly, before we ask for credit. No new monuments while old promises sit unfinished.

Reimagine

Only once we've rethought and rebuilt do we earn the right to dream bigger — roads that work, a country that runs on trust instead of workarounds, an India that finally matches the talent of its people.

03

The one thing we will never **compromise.**

Ownership. Right or wrong, we own it, learn from it, and lead on. A signature is a signature — on a road, a policy, a decision. It does not transfer downward when something fails, and it does not stay quiet when something succeeds. TIP is gender-neutral and equal-opportunity by design: no preference based on identity, only integrity and character.

Most institutions treat failure as something to manage, explain away, or quietly bury. TIP treats it as something to rethink and rebuild — publicly, immediately, without waiting to be caught.

Own the pothole, or don't lay the road.

Artificial intelligence has a role in restoring trust — not replacing human judgment, but checking it. Ensuring decisions are explained, not just announced. Ensuring no single person, office, or interest can quietly decide things alone, in the dark, the way it has always been done.

*This is not a party built around one face.
It is built around an idea.*

India's open wounds. Right now. Today.

CORRUPTION

96th

Stagnant and entrenched

Score unchanged since 2012. Best in Asia Pacific: 84. India: 38. That gap isn't failure. It's structural rot.

ROADS & DRIVING CULTURE

480+

Road deaths every single day

1% of world's vehicles, 11% of its fatalities. How a nation drives is how it governs — without rules, without consequence.

ETHANOL BLENDING (E20)

20%

A policy that bulldozed its citizens

Millions of pre-2023 vehicles incompatible. Engine damage not covered by insurance. Government moved at policy speed. Citizens paid at mechanic speed.

SEXUAL VIOLENCE

22.7%

Rape conviction rate

3 in 4 cases end without accountability. A system that announces zero tolerance and delivers single-digit results.

YOUTH & EMPLOYMENT

9.9%

Youth unemployment — 3× national average

60,700+ youth suicides in 2 years — highest in the world. GDP grows. Quality jobs don't. The demographic dividend is rotting unused.

WATER & CIVIC SENSE

80%

Of surface water polluted

\$6 billion lost to disease annually. Groundwater down 5.41m in Haryana in 10 years. Nobody's name on the signoff.

Every one of these issues has the same root cause: decisions without ownership, policies without maintenance, problems named without anyone's signature on the solution. A system designed for announcement, not accountability.

How TIP actually decides.

Every other party asks you to trust them. TIP asks you to verify. Every decision TIP makes — who represents it, which policy it adopts, which initiative it funds — is scored by three independent forces simultaneously. No single one can override the others.

SIGNAL

AI Score

An auditable AI model scores every decision on clarity, consistency, and integrity. **The methodology is public.** Anyone can read exactly how it scores and challenge the reasoning. Not a black box — a transparent standard.

VOICE

Citizen Vote

Every verified TIP member votes. No proxies, no booths, no money-per-vote. **One citizen, one equal say.** Open to anyone from 18 to 95 who has joined TIP — from Srinagar to Kanyakumari.

VERDICT

The Jury Council

A randomly selected group of citizens — like jury duty — deliberates and scores. **One decision. Then they rotate out. Forever.** No permanent power brokers. No dynasties. No insiders. Just ordinary Indians deciding for ordinary Indians.

$$\text{Signal} + \text{Voice} + \text{Verdict} = \text{TIP Score}$$

YOUR CHANCE

Your chance to be a National Treasure.

APPLY

Step forward yourself

You don't need a party connection, a family name, or a campaign war chest. You need a clear answer to three questions — and the willingness to be scored in public.

NOMINATE

Put someone else forward

The teacher fixing the school nobody visits. The engineer quietly patching the drainage. The person doing the work without waiting for permission. Give them the platform they've earned.

THE THREE QUESTIONS

- 01 What's broken in your city — and who owns that break?
- 02 What would you do in 90 days, specifically?
- 03 Why should India trust you?

For whom the future remains uncertain.

For whom victory still seems possible.

For whom all hope is not yet lost.
